audiences that half of the speculative managers in town began to figure on the pos sibility of taking her out on an extended tour. She did go on a provincial tour with Mr. Teddy Marks, a well-known songand-dance, serio-comic impresario, and this year she returned firmly convinced that a fortune awaited her. Her return was her-alded far and wide; she was generously advertised, and people talked about her nearly as much as they did last year. In fact, there was nothing the matter with her season at Koster & Blal's except that the public would not pay to go and see her, and at its close she quietly stole away. re suit. "You see, George is of who found, on his first arrival here, a playgoing public that knew all his songs by heart and Hterally clamored to behold and listen to him. It is doubtful that any music-hall entertainer ever achieved a more stupendous success than that which fell to the lot of Chevaller on the night of his New York debut. The ovation given him was so overwhelming as to literally stagger him, and he was subsequently found in his dressing room in a state bordering on collapse. His fame spread to other cities and enabled him to do well outside of New York in a company bearing his own name. This year he came back to America filled with rosy anticipations, and a few days ago he folded up his coster wardrobe and silently stole away to his home beyond th seas. It is a matter of record that during the latter part of his tour the receipts frequently fell below the amount that he hil nself had always been able to earn as a salary. Otero's fallure was complete, and it is certain that she will never appear here again, at least not-under the management of Mesars. Koster & Bial. She was bitterly disappointed, and was particularly indignant with the action of the authorities in connection with the Seeley dinner, because the awful publicity given to that affair deprived her of the chance of making money for horself by appearing at private entertainments. Up to the last moment s, I should think so! What she persisted in the belief that if any prominent American citizen had been kind wanted to see Fido and kept trying to get enough to commit suicide in the interest him to come from under the sofa, and of her engagement all would have been him to come from under the sofa, and there I sat by hed in a cold perspiration well, but so far from that the prominent citizens were not even willing to open a bottle of wine for her.

> At a recent meeting of one of the Good Government clubs of the town, an amatear reformer gravely proposed to turn one of the old downtown graveyards into a playground for the East Side children, and the suggestion met with so much favor at the hands of his associates that it is not improbable that some attempt will be made to carry out his scheme.

Isn't it time to call a halt to these gentlemen who want to go over us with a flaton of reform until the whole town is w, 'tiled down and sand-papered smooth like a piece of granite intended for a cemetery? Heaven knows dat dare is little enough le of the picturesque, old-fash-loved aspects of New York life that our fathers knew, and that there is no necessity for laying down asphalt over the soil that holds the bones of some of the best men and women that the town has ever known.
